### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael O'Neill on 1/28/08.

The application has been amended as follows:

Claim 27 should be amended to read "A computer readable medium which stores computer-executable code, said computer-executable program code executed by ...".  
Instead of "Computer-executable program code stored on a computer readable medium, said computer-executable program code executed by ...".

Claims 21-25 and 27 are allowed

The following is an examiner's statement of reasons for allowance:

Claims 21 and 27 are allowed because the prior art does not contain a valid combination of references that teach a data processing method executed by a printer driver in a computer terminal connected to an image processing apparatus, said method comprising: a first accepting step of accepting a document from an application program executing in said computer terminal; a displaying step of displaying a setting screen which displays configuration options for both a print setting and a transmission setting,

wherein an end user can set either the transmission setting or the print setting, said displaying step being initiated by calling the printer driver in accordance with the end user's selection of a printing menu of the application program; a second accepting step of accepting the end user's selection of the transmission setting or the print setting from the setting screen; a selecting step of selecting whether the document accepted in said accepting step is to be transmitted or printed by said image processing apparatus in accordance with the selection accepted from the end user in said second accepting step; a first step of setting the print setting in a case where said selecting step selects that the document is to be printed; a second setting step of setting the transmission setting including a destination in a case where said selecting step selects that the document is to be transmitted; a converting step of converting the document accepted in said accepting step into image data which is printable form; and a transferring step of transferring the image data converted in said converting step, and either the print setting set in said first setting step or the transmission setting set in said second setting step to said image processing apparatus to cause said image processing apparatus to print or transmit the image data.

Claims 22-25 are allowed because they depend upon an allowed base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
